—On the Jake Focht farm near Alliance four men last week cut a red oak tree that contained 108 pounds of honey. The tree measured 30 inches at the stump. The tree was hollow for twelve feet and contained eight feet of honey. In extracting the honey only two of the crowd received stings.

—When does the honeymoon end? That is one of the questions that has been discussed through the ages. It would be presumptuous, perhaps, for us to try to settle it, but just the same we have a strong suspicion that it's just about the time when she hears him coming outside the door she rushes to hurry up the dinner, instead of running to the door to meet him.

—If your newspaper or favorite magazine raises its subscription rate, or your sales book manufacturer asks a higher price per thousand than we have previously paid for your style book—if the paper used presents a laudable appearance, or has the cast of age, remember that every printer or manufacturer using paper is having troubles of his own in getting paper at any price.

—Miss Naomi Armstrong, a former Dispatch correspondent at North Benton, won the grand diamond medal at the oratorical contest at the state W. C. T. U. convention at Akron Oct. 18. —Judge Wm. H. Spence is a candidate for re-election for judge of the court of appeals. He has served with distinction, has won a reputation for careful consideration of the arguments of the attorneys in the case brought before the court and rendered his decisions without prejudice. His opponent, Judge Louis L. Farr of Lisbon is in no way qualified for the position as he has had no experience on the common pleas bench. He secured his title of Judge by serving as Probate Judge of Columbiana county. Certainly the people of this judicial district desire and need a Judge of the court of appeals trained in the school of experience. Judge Wm. H. Spence answers this requirement.—Ravenna Democrat.

Worth Careful Thought

Do you read the label to know whether your baking powder is made from cream of tartar or, on the other hand, from alum or phosphate?

Royal Baking Powder is made from cream of tartar, derived from grapes, and adds to the food only wholesome qualities.

Other baking powders contain alum or phosphate, both of mineral origin, and used as substitutes for cream of tartar because of their cheapness.

Never sacrifice quality and healthfulness for low price.

PROMISES AND PERFORMANCE

Ex-Gov. Cox, Democratic candidate against Gov. Frank B. Willis spoke at Wooster last Friday. In a speech full of force and vigor he arraigned Gov. Willis for his campaign promises of two years ago which he has utterly failed to perform. Gov. Cox called attention to the following:

"Gov. Willis promised the coal miners of the state their hard won run of mine screen law would not be harmed during his administration, and then when the coal operators pushed the Gallagher bill through the legislature he signed it. The coal miners had contributed largely to his campaign fund."

"He promised sheep owners of the state their flocks would be better protected from vagrant dogs that caused them enormous losses. Then, when women from the northern part of the state leading poodle dogs into the state house, asked him to veto the law that permitted the killing of vagrant dogs, the poodle dog fanciers won an easy victory and the sheep promise went to protest."

"He promised working people of the state the workmen's compensation law would not be harmed, and now he permits enemies of the compensation law, the liability insurance companies, to help administer it to breed discontent among the working men who are injured, the whole thing being done to help break down the law of workmen's compensation."

"He told the people of the state there was a huge deficit in the treasury and then receipted for more than \$11,000,000 when he went into office."

"He promised the people of the state real economy and then spent \$1,000,000 a year more than other administrations did."

"He promised much to the farmers of the state and then destroyed the agricultural commission, the best thing ever devised to lend aid to Ohio farmers."

"The board was simply the four agricultural branches of the state put together, their work co-ordinated and made effective."

"He promised increased attention to state institutions and then sought to dismiss Gen. Burnett of the Sandusky soldiers' home, the most beloved head of a state institution Ohio has seen."

"He turned the important work of the board of administration over to his friends and his principal friend on the board, aided by convicts, sought to tear up the organization at the state penitentiary and continued it until the developments thrilled an outraged state and they were compelled to stop."

"So general has been the broken promises and the strange conduct of matters that no one speaks today in defense of his administration, save the governor, his appointees, and those who seek place with him."

Applying Lime in the Fall While it is preferable to apply lime to a field when preparing the seed bed, it is better, when badly needed, to spread it during the fall or any time during the winter rather than to neglect it altogether. Ground limestone will not injure either the winter wheat fields or clover meadows.

There are times when the cheerful folks are mighty glad that the grouch is along to make a kick.

DEAFNESS CANNOT BE CURED by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circular free.
